The Us Organ Procurement System A Prescription For Reform Evaluative Studies
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s mischievous and how she lets him get away with too much.

Tom comes home at suppertime. He gets his dinner late, and Aunt Polly can tell he has been skipping school that afternoon and went somewhere to play. When she asks him what he has been doing, Tom claims he was only out walking. However, Tom’s true adventure takes place at the mouth of the river. Tom has sworn the boy who saves his life will have a gold ring and a purse of money. Tom waits for the boy to come along, and eventually, he chooses a young man in the way home.

When he returns home, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Just goes by, and Tom tries to get Jim to do some of the whitewashing in return for a “white alley,” a kind of marble. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.

The Organ Procurement System

The OPTN is operated under contract with the U.S. Dept. of Health and Human Services by the United Network for Organ Sharing (UNOS). This Web site provides data and educational information about organ donation, transplantation and the matching process.

Organ procurement (previously called organ harvesting) is a surgical procedure that removes organs or tissues for reuse, typically for organ transplantation. It is heavily regulated by United Network for Organ Sharing (UNOS) to prevent unethical allocation of organs. There are over 110,000 patients on the national waiting list for organ transplantation and in 2016, only about 33,000 organ transplants were performed.

End-Stage Organ Disease—A disease that leads, ultimately, to permanent, complete failure of an organ to function. Some examples are emphysema (lungs), cardiomyopathy (heart), and polycystic kidney disease (kidneys). End-Stage Renal Disease (ESRD)—The complete or almost complete failure of the kidneys to function. The kidneys can no longer remove wastes, concentrate urine, and regulate...
